

NEW ITEMS FOR 1950

Supplement to Catalog D 49

Just as all great events are heralded by a preview, so the new **MÄRKLIN** catalog D 50 once again brings a wealth of remarkable splendid new items. The following extracts from this catalog will serve to give an idea of the completeness of the 1950 assortment.

Many a **MÄRKLIN** fan will recognize that those new items, which now go out to points all over the world, including the heavy freight locomotive G 800, represent a mile stone in the model and toy field which not only equal all the expectations but by far surpass them and fill a long established need on every model layout.

A glance at the above cut of the 6 most beautiful **MÄRKLIN** Super Models shows that the G 800 is second to none in appearance, construction, and performance, and will form a valuable addition to any locomotive park. The same is true of the other new models such as the locomotives RE, SE, RSM, RM, and the interurban streamliner DT, as well as the accessories shown in these lists. These provide added proof to the slogan:

MÄRKLIN *The Rail Fan's Pride and Joy*

GEBR. MÄRKLIN & CIE. ^{GM}_{BH} · GÖPPINGEN/WTTBG.
